# Maintain Real-Time Equipment Accountability

# INVENTORY APP

**Mobile issuance, returns, & location tracking**

## ISSUE EQUIPMENT

Select non-consumable and consumable equipment to issue to a resource. Link issuance to active events (optional) to track cost distribution for after action reporting.

## RETURN EQUIPMENT

Return equipment back to the warehouse by searching for a non-consumable or by selecting a resource's non-consumable equipment to return. Optionally, mark returned equipment as Out of Service, Missing, or Being Serviced and add notes.

## AUDIT / VIEW / ADJUST EQUIPMENT

Quickly manage your inventory counts and confirm quantities. Use your mobile device's camera to update, review, and confirm inventory counts.

## QUICKLY BUILD CARTS WITH SCANNING

Use the mobile device's camera to scan people and equipment to build the issue and return carts, while also enabling users to view equipment profile details, adjust consumable quantities, or change non-consumable equipment statuses within the app.

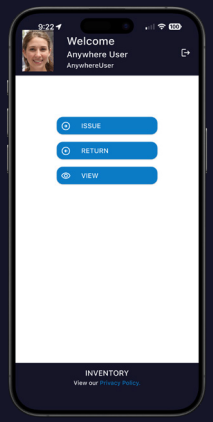
GET IT ON Google Play

Download on the App Store

SALAMANDERLIVE™

**Issue, return, view, adjust, and audit equipment within the app to maintain real-time visibility of equipment locations. Track resource assignments by individual and optionally associate equipment issuance with a specific event for streamlined accountability.**

- Use with any Android or iOS device
- Access available equipment in real-time
- Easily know where equipment is at, at all times
- Scan or download equipment to build a cart to issue or return equipment
- Associate issued equipment with an event
- Easily update the status, quantity, image, and add comments on equipment
- Add and view notes
- Run reports through SalamanderLive



**The inventory app disconnects users from their computers, enabling issuing, returning, and auditing from anywhere. This mobility gives users the flexibility needed to move around while conducting audits and completing issuances and returns while on-scene.**
