EVENTS PRO BENEFITS:

RESOURCE TIMER

- Maintain scene safety and ensure people do not exceed their limitations.
- Quickly search personnel assignments
- Set timers for personnel to improve health and safety
- Know how long personnel have been assigned
- Export timer data into a .CSV report

CHART

- Create assignment hierarchy
- Add assignments to Charts
- Edit assignments, including address, plotting information, and notes
- Add and more resources within assignments
- Take a snapshot image of the Chart

GIS MAPPING

View location of assignments with EVENTS PRO in combination with plotting:

- Events
- All Resources checked into Assignments (with ESRI Integration)
- All TAG APP Users (with GIS enabled)
- All TRACK APP Users (with GIS enabled)

ROSTER

- View anyone that is affiliated to an event
- Quickly email personnel within the event
- Edit event logs of personnel
- At a glance, see each resource's ID, Name, Title, Organization, Current Assignment, and Last Checked in Time / Date
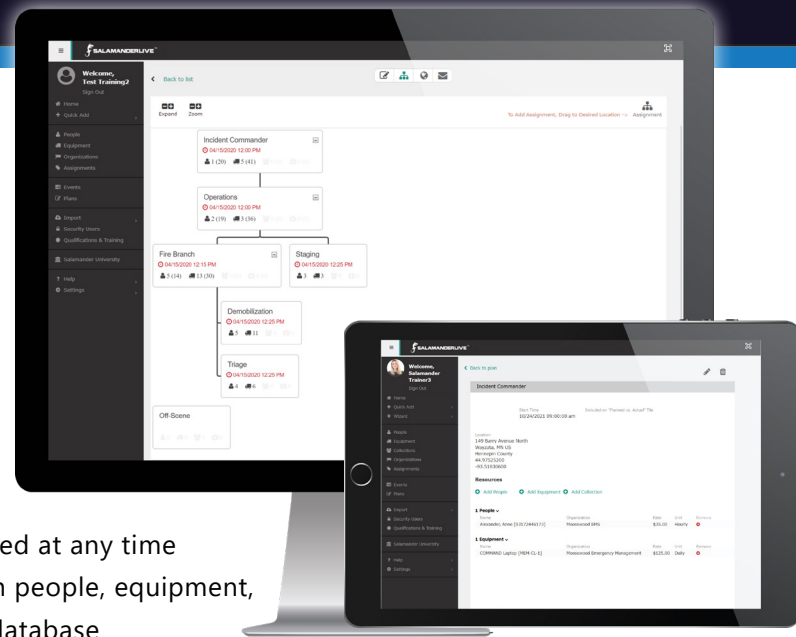

PLAN FOR TOMORROW

With PLANS

Today, being proactive and planning for the unforeseeable can provide the extra moments needed in a chaotic situation. With our planning tool, users can rest assured that time is on their side whether they are faced with a pre-planned or spontaneous event. In a moment's notice, quickly activate a plan, turning it into a live event and start accounting for resources immediately.

Pre-plan for assignments, people, equipment, and collections. Add details to each assignment, including start date / time, address, and any important assignment details. Move assignments around to build a hierarchy for an event.

Lastly, with a few clicks, quickly email the assignment details to planned personnel so they have the information they need (gear, time and location to meet, and more).

- Have visibility to pre-planned resources cost rates (individual or account)
- Once a plan is activated, view all assignments, their start dates and times, and planned resources in the TRACK APP
- Users scanning planned personnel into the event with the TRACK APP can choose to check in personnel early, on time, or late
- View actual vs planned data within an active event
- Prepare unlimited event templates that can be activated at any time
- Plan templates include pre-planning assignments with people, equipment, and collections stored within your SalamanderLive™ database
- Stage assignments with start times and physical addresses
- View assignment locations on one map and easily make adjustments to the location by dragging the pin on the map
- Email special instructions and communication to pre-planned personnel
