

VOLUNTEER MANAGEMENT

When volunteers provide support, Salamander accountability is essential to protect everyone involved. Our Volunteer Management solutions provide end-to-end visibility with pre-credentialing, just-in-time credentialing, and tracking to manage all resources – people, equipment, and activities – with confidence and clarity.

Just-In-Time Management

Quickly and accurately create event specific credentials for 'spontaneous' volunteers responding to an event using RAPID TAG. In seconds, a badge or ID is created and the volunteer can be tracked throughout an event or exercise.

Volunteer Program Management

Pre-credential volunteers that are apart of a volunteer group, such as CERT, MRC, etc. Additionally, manage qualifications and trainings as well as track any assets assigned to the volunteers.

Credentials featuring unique barcodes enable automatic identification and can be printed on various mediums, including hard cards and wristbands. The system can instantly pull data from driver's licenses to generate interoperable IDs in seconds, streamlining the onboarding process. Volunteer hours are tracked down to the second, providing precise records of service. And with in-field activity automatically syncing to SalamanderLive™ when online, you gain accurate, real-time reporting for every aspect of the response.
