

# VISITOR MANAGEMENT

## Reimagining the Front Desk

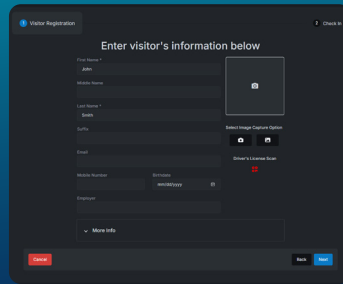

Salamander delivers a uniform, easy-to-follow process for visitors at both check-in and check-out. This structured approach ensures your team maintains complete accountability, full visibility into who is on-site, and a streamlined process that supports secure, efficient operations.

### Four Steps. One Modern Welcome.

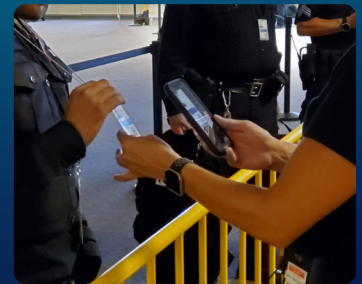

**Identity  
Captured**

**Digital  
Profile Created**

**Badge  
Produced**

**Authorization  
Completed**

#### Complete Accountability

Use the already trusted everyday solution for accountability and apply to all visitors on-scene.

- Print time sensitive visitor badges with expiration
- See visitor whereabouts during an event in real-time
- Automatically share visitor management data with other Salamander solution features (like Events)

#### Complete Visibility

See all visitor activity from anywhere, anytime. From a single location to multiple, our centralized dashboard allows full control.

- Real-time visitor audit logs
- Access reports for current and previous activity
- See and refine the dataset to get the insights you need

#### Streamlined Process

Fast check-ins and fast check-outs, along with real-time management, improve the visitor's experience from start to finish.

- Self check-in kiosk mode
- Rapid capture of scanning with ID Scan

# Powered By Simplicity

Behind every smooth check-in, secure interaction, and confident departure are the tools that make it all possible. Our Visitor Management solution is built on nine core capabilities that work together to enhance safety, improve efficiency, and create a better experience for every visitor who walks through your doors.

## ✓ SELF-SERVICE CHECK-IN

Set SalamanderLive to Kiosk mode and have your visitor's self-service all check-ins

## ✓ ID SCAN

Simply scan any government issued ID or SalamanderLive badge to rapidly populate a visitor management badge

## ✓ EVENT MANAGEMENT

Not only note that a visitor is on premises, but place them in the appropriate assignment for true accountability

## ✓ QUICK CHECK OUT

Check out is a simple two-step process. Scan and then click to check out

## ✓ DASHBOARD

A simple yet effective interface to show you everything you need to manage your visitors

## ✓ TIME TRACKING

Accurately track the time all visitors are on-premises to off-scene

## ✓ EVACUATION MANAGEMENT

Instantly take your visitor roster and apply it to your evacuation plan set within SalamanderLive

## ✓ HOST NOTIFICATIONS

Automatically alert hosts when visitors arrive with customized messaging via email

## ✓ REPORTING

Because all actions are logged, generate detailed reports of all activity both real-time and historical

### SUPPORTS CJIS COMPLIANCE

Salamander **records visitor details**, including **check-in** and **check-out times**, and **securely logs all activity** for reports and audits.

### ENHANCED QR CODE SECURITY

Any **unauthorized visitors** can be immediately flagged to **enforce access restrictions** and prevent any attempt to enter the building.

### ESSENTIALS COVERED

Salamander has you covered for all your visitor management hardware and supply needs.
