

Building Safer Events With Trusted VOLUNTEER ACCOUNTABILITY

Volunteer Management provides end-to-end visibility with pre-credentialing, just-in-time credentialing, and tracking to manage all resources both people, equipment, and activities, with confidence and clarity.

BUILT FOR **EVERY TYPE** OF VOLUNTEER Supporting Safe And Coordinated Operations

Pre-Planning of Volunteers

Volunteer pre-planning focuses on managing the pool, maintaining qualifications, keeping the roster current, and selecting the right people when needed.

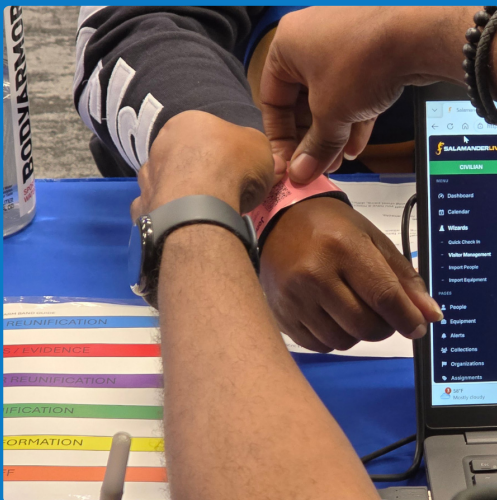

1. Proactively create a volunteer profile
2. Print a badge
3. Use the badge for accountability throughout the event

Just-In-Time Volunteers

Just-in-time volunteering focuses on rapid intake. Volunteers are quickly registered on arrival and deployed immediately, with an emphasis on fast processing and accurate time tracking.

1. Scan volunteers' state issued identification
2. Rapidly print a volunteer tag
3. Volunteers use their badge throughout the event

Volunteer Profile Management Key Features

Profile Detail Repository

Document key information such as basic personal, employment details, location and contact information, medical information, and any custom details.

Qualifications Management

Add qualifications to a record, including certification details, issue and expiration dates, attach files, and choose to encode the qualifications in the QR code.

Rates Capture

Document people standard rates used for event costs calculations and any standby, overtime, and / or other rates.

Profile Image Capture

Capture or upload a photo to be used on the printed and digital credential, and each time the image is updated, maintain a complete, accessible history of all previous photos.

Training Management

Easily manage trainings for each person and keep their records up-to-date. For every training entry, include certification details, issue and expiration dates, and attach supporting documentation before choosing whether to encode it in the QR code.

Historical Notes Logging

Log notes in the people profile, creating a running record that can be viewed at any time. Each note is timestamped and identifies who entered it.

Individual Profile File Storage

Keep important documents, files, and images organized and easily accessible within each person's profile. Add key details such as start and expiration dates, descriptions, and statuses to streamline document management.

Custom Fields Capture

Custom fields, managed by account administrators, offer flexibility to capture information outside the standard people profile, ranging from simple details like shirt sizes or more specific data such as FEMA SID's.

Medical Information Capture

Record medical details, including emergency contacts, allergies, personal and insurance details, and more, while using permission-based access to ensure privacy is maintained.

Trusted Nationwide to Support Volunteers in Every Situation

Incorporate Volunteer Tracking into your Existing Event

Event operations move fast, and volunteer identification must keep pace. Our platform streamlines event accountability end-to-end. Pre-planned credentials in assignments ensure volunteers are identified on arrival and know where to go. Then all credentials, when scanned real-time, show who is on-scene, where they are assigned, and how long they have been active. A unified dashboard ties it all together with rostering, mapping, ICS views, and communication tools for full coordinator control.
