

COMPLETE INSIGHT INTO YOUR **PUBLIC WORKFORCE** DATA FOR INFORMED DECISIONS

People Management
Training Management
Qualification Management
Badge Management
Document Management
Organization Management

Salamander centralizes people profiles, event histories, and equipment relationships to give agencies a 360° operational view. It creates profiles with roles, credentials, and compliance status; automatically tracks each profile's journey through events with time-stamped, auditable logs; and links equipment like vehicles and credentials directly to people and events for full lifecycle traceability.

HIGHLIGHTS

- SalamanderLive™ is a secure, cloud-based platform that centralizes all your resource data, letting you print interoperable TAGs, manage information, and maintain full event visibility from anywhere.
- Salamander TAGs are fully interoperable nationwide, allowing all organizations on the platform to account for resources without relying on separate systems.
- TAG security is elevated through real-time TRACK APP scans that authenticate each credential by cross-referencing five data points with SalamanderLive.
- Personnel information is embedded in the credential's QR code, creating a portable offline database containing identity and qualification details.
- Link personnel records to collections to quickly activate and manage the right resources during an event.
- Enable personnel to self register and then manage their profiles through an intuitive form where they can update photos, contact details, qualifications, training, and more.
- Communicate through SalamanderLive by sending credentials, contacting personnel, and requesting equipment, with all activity automatically logged for a complete record.

Designed for **Simplicity**. Built for **Power**.

Complete Visibility

With our Public Workforce solution, you can be confident that you will have complete, real-time situational awareness. From capturing detailed personnel information and documents to knowing where your personnel are throughout every event, Salamander ensures all our solutions are working together to give a complete operational picture.

Trusted Solution

Salamander is a trusted, nationwide solution relied on daily to manage the public workforce. Whether you are tracking attendance for meetings and trainings or ensuring accountability during large-scale events, you can count on Salamander to support you every step of the way.

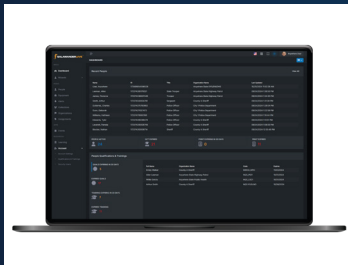

Effortless Execution

In moments of chaos, every second counts. That is why our solutions are built to be intuitive, interoperable, accessible, and confidence inspiring. With streamlined forms, a QR based "mobile database," and more, you can manage your workforce effortlessly, even under pressure.

Create a Resource

With the proper permissions and just a few keystrokes, the profile is created.

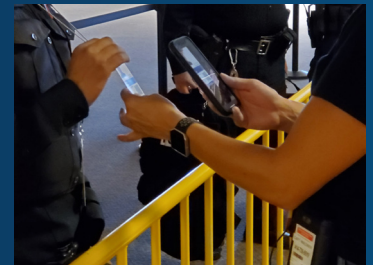

Manage the Resource

Manage all datapoints on your resources all in one place.

Print a Badge

Securely control where badges can be printed for distribution.

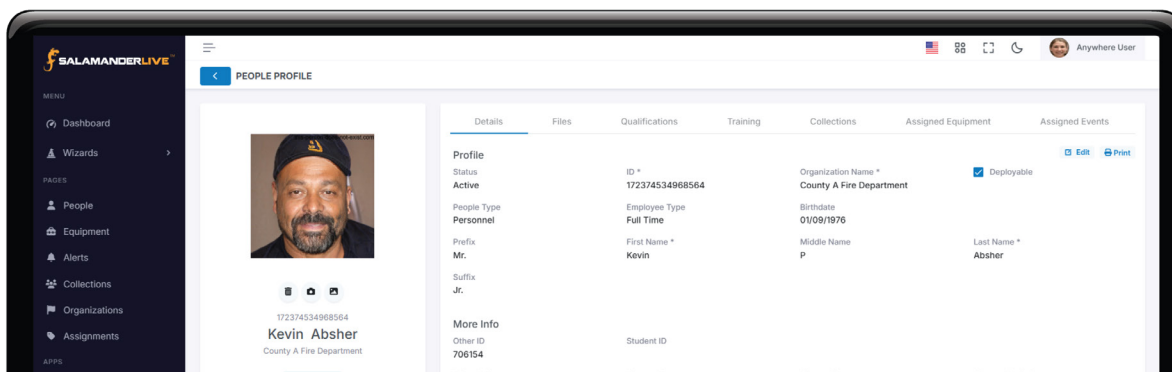

Use the Badge for Additional Accountability

During events, track and assign equipment, and much more.
